

GABRIEL NAANZAM TEMTSEN

Full-Stack Software, Autonomous AI Agent & Web3 Protocol Engineer

Available for Global Remote Outsourcing, Staff Augmentation & Contract Engineering (UTC+1 · Full UK/EU & US EST Overlap)

Location: Jos, Nigeria (Remote Worldwide)
Email: gabrieltemtsen@gmail.com · Tel: +234 905 239 0212
Portfolio: gabedev.xyz · GitHub: github.com/gabrieltemtsen
LinkedIn: linkedin.com/in/gabriel-temtsen-bb0a8a

EXECUTIVE SUMMARY

4+ Years Shipping Production Web2, Web3 & AI Systems

Results-driven Full-Stack Software, AI & Blockchain Engineer with 4+ years of hands-on production experience architecting high-reliability web applications, autonomous AI agent ecosystems (RAG, MCP, x402 micropayments, OpenAI/Gemini), cross-border fintech rails, and audited smart contracts. 2x Hackathon Winner (Avalanche Summer Hackathon & Web3 Afrika x Bunzz) and Top 5 Computer Science graduate (4.18/5.00 CGPA) with 30+ shipped repositories spanning Next.js, TypeScript, NestJS, Python, Kotlin, and Solidity. Proven track record of owning products end-to-end—from system design and database modeling to CI/CD deployment—for distributed remote teams across Europe, North America, and Africa.

4+ Years Full-Stack, AI & Web3 Production Delivery	2x Winner / 11+ Hacks Avalanche & Bunzz Winner + Global AI/Web3 Finalist	30+ Production Apps Shipped across EVM, Hedera, Celo, Stacks, Stellar & Mobile	4.18 / 5.00 CGPA Ranked Top 5 in B.Sc. Computer Science Class
---	---	---	--

CORE TECHNICAL COMPETENCIES & STACK

ATS & Enterprise Outsourcing Aligned

Languages:	TypeScript, JavaScript (ES2024+), Python, Solidity, Kotlin, Clarity (Stacks), SQL, HTML5/CSS3, Bash
Frontend & Mobile:	Next.js (14/15/16 App Router), React.js, Vue.js, Tailwind CSS, React Native (Expo), Android Jetpack Compose, PWAs, Farcaster Mini Apps, Wagmi / Viem / Ethers.js
Backend & APIs:	Node.js, NestJS, Express.js, FastAPI, Convex (Realtime Serverless), RESTful APIs, GraphQL, The Graph (Subgraphs), WebSockets, Webhook Orchestration (Paystack, Paycrest)
AI & Agentic Systems:	LLM Orchestration (OpenAI, Gemini, Claude), Model Context Protocol (MCP), Hybrid RAG & Vector Search, x402 Agent Payment Rail, ElizaOS, Prompt Engineering, Sparse MoE & On-Device Inference
Blockchain & Web3:	Ethereum (EVM), Solidity & Foundry (Forge/Cast), Hardhat, Hedera (HCS / HTS), Celo, Base, Avalanche, Arc Mainnet, Stacks (Clarity), Stellar (Soroban), Aptos (Move), EigenLayer AVS, Request Network
Databases & DevOps:	PostgreSQL, MongoDB, Redis, SQLite, Prisma / Mongoose, Docker, Docker Compose, Fly.io, Vercel, Git / GitHub Actions CI/CD, Linux / GrapheneOS, Cisco Networking (CCNA)

PROFESSIONAL ENGINEERING EXPERIENCE

Reverse-Chronological (2022 – 2026)

AI, Web3 & Full-Stack Software Engineer · TechFusion Africa Jan 2024 – Present · Jos, Nigeria (Hybrid / Remote)

- End-to-End Product Architecture: Lead the design, development, and cloud deployment of full-stack web applications, AI-powered automation pipelines, and decentralized financial (DeFi) platforms using TypeScript, Next.js 15/16, NestJS, Python, and MongoDB/PostgreSQL.
- Multi-Corridor Fintech Infrastructure (ClovaPay Africa): Architected an open-source stablecoin-to-local-fiat off-ramp platform settling across 9 African & global corridors (Nigeria, Kenya M-PESA, Ghana MoMo, Uganda, Tanzania, Malawi, Brazil Pix) via Paycrest webhooks, Stacks/Clarity smart contracts, and x402 pay-per-call agent APIs.
- Marketplace & Logistics PWA (Houselyx): Engineered a full-stack Progressive Web App (Next.js 15, Convex, Clerk, Paystack, Tailwind CSS 4) unifying verified property, building material, and farm produce marketplaces with dual-path webhook payment verification and real-time freight dispatch tracking.
- Agentic Micro-Lending & Conversational Finance (Clenja): Built a non-custodial cooperative micro-lending protocol and Telegram/WhatsApp AI financial assistant on Celo featuring Para per-user wallets, SelfClaw borrower verification, and deterministic smart-contract risk guardrails.
- Production AI & RAG Systems: Integrated LLM workflows (OpenAI, Google Gemini), vector embeddings, and structured JSON synthesis into client products—reducing manual data triage and eliminating LLM numerical hallucinations via deterministic pre-computation layers.

Independent Full-Stack, AI Agent & Protocol Engineer · Global Web3 & Open-Source Ecosystems Nov 2022 – Present · Remote (Hedera, Celo, Drips/Stellar, Base, Arc)

- Autonomous Agent Data Market (ConduitX on Hedera): Engineered a decentralized execution layer enabling AI agents to discover, meter, and audit on-chain Subgraph data with sub-2-second micro-cent settlement over x402, immutable Hedera Consensus Service (HCS) receipts, and native MCP server tooling for Claude Desktop & Cursor.
- Offline On-Device AI Engine (Duniya for Android/GrapheneOS): Built an air-gapped mobile research engine in Kotlin & Jetpack Compose implementing Sparse Mixture-of-Experts (MoE) routing, N-gram speculative lookahead, and Hybrid BM25+Vector RAG over 50 GB UFS flash packs with zero network permissions.
- Mainnet DeFi & Algorithmic Trading Systems: Deployed GScoop (a trust-minimized ROSCA cooperative credit protocol in Solidity 0.8.24 on Arc Mainnet with 19/19 passing Foundry test suites) and Senpi Agent (an autonomous momentum & mean-reversion trading agent on Hyperliquid with regime classification and DSL trailing stops).
- Open-Source Ecosystem Contributions (Drips & Stellar): Delivered 10+ open-source full-stack and smart-contract repositories including StellarLend, Stellar-Stream, Stellar-Portfolio-Rebalancer, Revora, and ProxyPay, maintaining strict API contracts and automated test coverage.

Full-Stack Web Developer (Contract / Intern) · IVULA Technologies

Jan 2024 – Mar 2024 · Remote

- Engineered responsive, mobile-first web interfaces and scalable RESTful APIs using React, TypeScript, Node.js, and NestJS, improving client-server data synchronization and mobile accessibility scores across agile cross-functional remote sprints.

IT Systems & Database Associate (NYSC) · Akwanga E-Library

Nov 2023 – Oct 2024 · Nasarawa, Nigeria

- Administered institutional databases, LAN infrastructure, and workstation systems across the digital library facility (99%+ hardware/network availability) and delivered technical training workshops for staff on database management and operational cybersecurity.

Junior Full-Stack Developer · TechFusion Africa

Apr 2022 – Oct 2022 · Jos, Nigeria

- Developed and shipped full-stack startup web applications across client and server tiers using Vue.js, TypeScript, NestJS, and MongoDB, including Lickle-Blog (a complete multi-user blogging and CMS platform) with unit and endpoint integration testing.

 **Winner — Web3 Afrika × Bunzz** Official Winner · May 2023

Selected as an official hackathon winner for architecting and deploying a modular smart-contract decentralized application utilizing Bunzz's smart contract infrastructure and React/TypeScript frontend integration.

 **3rd Place — Avalanche Summer Hacks** 3rd Place · Nov 2022

Co-led team **Rustydevs** to build and ship **Avax-Lottery dApp**, a provably fair, decentralized on-chain lottery application deployed on the Avalanche C-Chain with automated prize pool distribution.

Global AI Agent & Web3 Hackathon Finalist / Shipped Submissions (2023 – 2026):

Agents at Work Hackathon	Autonomous multi-step enterprise AI agent workflows, tool-calling orchestration & verification	Sept 2026
Build with DataHub: The Agent Hackathon	Metadata-driven AI agents, context-aware data discovery & automated governance pipelines	Sept 2026
AMD Developer Hackathon	High-efficiency AI inference optimization, hardware-aware compute & developer tooling	June 2026
Hedera Hello Future Apex Hackathon	Built ConduitX & Apex-Learn : x402 agent micropayments + Hedera Consensus Service (HCS) ledger	Mar 2026
Request Network End-of-Year Hackathon	Programmable crypto invoicing, automated on-chain payment requests & multi-currency settlement	Nov 2024
Move on Aptos & Code Collision Hackathon	High-throughput smart contract engineering & decentralized consumer applications on Aptos	Aug–Oct 2024
EigenLayer AVS MicroHacks Hackathon	Actively Validated Services (AVS) restaking primitives & cryptographic verification workflows	May 2024
Pi Network & Web3 Afrika Mini Hackathons	Mobile-first decentralized commerce & accessible Web3 utility dApps for emerging markets	Apr 2023

SELECTED PRODUCTION & OPEN-SOURCE SYSTEMS

Codebases Available at github.com/gabrieltemtsen

ConduitX — Agentic Data Market & x402 Rail Next.js 16 · Hedera HCS · MCP

Decentralized market and execution layer where autonomous AI agents procure The Graph Subgraph data per query, settle microcents in **<2s over x402 on Hedera**, and log immutable reputation receipts to HCS. Includes MCP server for Claude Desktop & Cursor.

Duniya — Offline Sparse-MoE Android Engine Kotlin · Compose · Hybrid RAG

Air-gapped Android & GrapheneOS AI research engine combining **8×8 Sparse Mixture-of-Experts (MoE)** token routing, N-gram lookahead, and hybrid BM25 + vector RAG over 50 GB UFS flash packs with Linux /proc kernel telemetry and zero network sockets.

ClovaPay Africa — Multi-Corridor Off-Ramp TypeScript · Clarity · Paycrest

Crypto-to-fiat liquidity and settlement protocol converting stablecoins & STX directly into local bank accounts and mobile money across **9 African & LatAm corridors** (NGN, KES, GHS, UGX, TZS, MWK, BRL) with x402 agent-native APIs.

Clenja — AI Cooperative Micro-Lending Celo · Solidity · Next.js 16

Non-custodial cUSD lending pool and Telegram/WhatsApp AI finance assistant on Celo. Features deterministic smart-contract underwriting, **SelfClaw** borrower verification, **Para** embedded wallets, and x402-monetized quote/offramp endpoints.

Houselyx — Verified Marketplace & Logistics PWA Next.js 15 · Convex · Paystack

Installable PWA marketplace for verified real estate, building materials, and farm produce with integrated Jos ⇌ Abuja logistics. Features dual webhook/callback Paystack settlement, admin verification queues, and end-to-end transit state machines.

GScoop — Mainnet ROSCA Credit Protocol Solidity 0.8.24 · Foundry · Arc

Trust-minimized Rotating Savings and Credit Association protocol deployed on **Arc Mainnet** (Chain ID 5042) using native USDC gas. Enforces collateralized payouts, automated default slashing, and **19/19 Foundry unit/fuzz tests**.

FPL Doctor — Deterministic Analytics + Gemini Next.js · TypeScript · Gemini

Dual-target **Farcaster Mini App & PWA** computing expected Fantasy Premier League points (xG/90, xA/90, fixture multipliers, clean-sheet odds) via a pure auditable TypeScript engine paired with strict zero-hallucination Gemini commentary.

Senpi Agent — Hyperliquid Trading System TypeScript · Hyperliquid · DSL

Self-hosted algorithmic trading agent classifying live market regimes (Trending vs. Choppy) to execute maker-first breakout or mean-reversion strategies with server-side DSL trailing stops, hard code-enforced risk caps, and an operator kill-switch UI.

EDUCATION

B.Sc. in Computer Science Oct 2019 – Jul 2023

Bingham University · Karu, Nigeria

- **CGPA: 4.18 / 5.00** — **Ranked Top 5 in Department**, Second Class Honours (Upper Division).
- **Capstone Research:** Designed & built a *Decentralized Fundraising Platform and Governance DAO* on Ethereum.
- **Activities:** Google Developer Student Clubs (GDSC), University Soccer Team.

SSCE Secondary Diploma 2013 – 2019

Emmanuel International College · Jos, Nigeria

CERTIFICATIONS & CREDENTIALS

Technical Support Fundamentals · Google & Coursera	Jan 2026
Smart Contracts Specialization · SUNY Buffalo / Coursera (FK26TAVG7X72)	Feb 2023
Blockchain Basics · SUNY Buffalo / Coursera (S4QLHD658PXZ)	Feb 2023
Introduction to Web Development · Coursera (34XL49DDARNS)	Feb 2023
Cisco Certified Network Associate (CCNA) · Verified via Upwork	Jul 2022
Cisco IT Essentials · Cisco Networking Academy	Mar 2021

REMOTE WORK & OUTSOURCING READINESS

Languages: English (Native/Fluent C2) · Hausa (Conversational)
Timezone & Collaboration: WAT (UTC+1) — 100% overlap with UK/EU & 5+ hrs overlap with US EST. Experienced in async Git/PR workflows, Linear/Jira, Slack, Dockerized handoffs, and automated test suites.
