

GABRIEL NAANZAM TEMTSEN

Full-Stack Software, Autonomous AI Agent & Web3
Protocol Engineer

Jos, Nigeria (UTC+1 · Global Remote / Outsourcing) · +234 905 239 0212
gabrieltemtsen@gmail.com · gabedev.xyz · github.com/gabrieltemtsen · linkedin.com/in/gabriel-temtsen-bb0a8a

EXECUTIVE SUMMARY

Full-Stack Software, AI & Web3 Engineer with **4+ years of production experience** building high-reliability web apps, autonomous AI agent pipelines (**RAG, MCP, x402, OpenAI/Gemini**), cross-border fintech infrastructure, and smart contracts. **2× Official Hackathon Winner** (Avalanche & Web3 Afrika × Bunzz), **11+ Global Hackathon Finalist**, and **Top 5 Computer Science Graduate (4.18/5.00 CGPA)** with 30+ shipped products across TypeScript, Next.js, NestJS, Python, Kotlin, and Solidity.

TECHNICAL STACK

Languages & Core: TypeScript, JavaScript, Python, Solidity, Kotlin, Clarity (Stacks), SQL, HTML5/CSS3, Bash
Frontend & Mobile: Next.js (14–16 App Router), React, Vue.js, Tailwind CSS, React Native (Expo), Jetpack Compose, PWAs, Wagmi/Viem
Backend & Data: Node.js, NestJS, Express, FastAPI, Convex, PostgreSQL, MongoDB, Redis, REST, GraphQL, Subgraphs, Docker, CI/CD
AI & Blockchain: OpenAI/Gemini/Claude, Hybrid RAG, MCP, x402, Foundry, Hardhat, Ethereum/EVM, Hedera HCS, Celo, Base, Avalanche, Arc, Stellar

PROFESSIONAL EXPERIENCE

AI, Web3 & Full-Stack Software Engineer · TechFusion Africa Jan 2024 – Present · Jos, Nigeria (Hybrid / Remote)
Lead end-to-end architecture and deployment of full-stack web applications, AI automation systems, and cross-border DeFi rails using **Next.js 15/16, TypeScript, NestJS, Python, Solidity, and MongoDB/PostgreSQL**.

- Architected **ClovaPay Africa**, a multi-chain stablecoin-to-fiat off-ramp settling directly into local bank accounts and mobile money across **9 African & LatAm corridors** (NGN, KES, GHS, UGX, TZS, MWK, BRL) via Paycrest, Clarity smart contracts, and **x402 agent-native APIs**.
- Engineered **Houselyx**, a verified property, building material & agricultural marketplace PWA (**Next.js 15, Convex, Clerk, Paystack**) featuring dual webhook/callback payment settlement, admin verification queues, and real-time freight logistics dispatch.
- Built **Clenja & Clenja Agent**, a non-custodial cUSD micro-lending protocol and Telegram/WhatsApp AI assistant on **Celo** with Para embedded wallets, SelfClaw borrower verification, and x402-monetized quote/offramp endpoints.

Independent Full-Stack, AI Agent & Protocol Engineer · Global Web3 & AI Ecosystems Nov 2022 – Present · Remote (Hedera, Celo, Drips/Stellar, Base, Arc)

- ConduitX (Hedera HCS + x402 + MCP):** Built a decentralized AI agent data market settling Subgraph queries in **<2s over x402** with immutable HCS reputation receipts and native **Model Context Protocol (MCP)** tooling for Claude Desktop & Cursor.
- Duniya (Android/GrapheneOS Offline AI):** Engineered an air-gapped mobile research engine in **Kotlin & Jetpack Compose** combining **8×8 Sparse MoE routing, N-gram lookahead, and Hybrid BM25+Vector RAG** over 50 GB UFS flash packs with zero network sockets.
- GScoop & Senpi Agent:** Deployed **GScoop** (trust-minimized ROSCA savings/credit protocol in **Solidity 0.8.24** on **Arc Mainnet** with 19/19 Foundry tests) and **Senpi Agent** (autonomous regime-switching trading agent on **Hyperliquid** with DSL trailing stops).
- Open-Source Delivery (Stellar / Drips & Farcaster):** Shipped 10+ open-source full-stack apps (*StellarLend, Stellar-Stream, Portfolio-Rebalancer, Revora, ProxyPay*) and **FPL Doctor** (deterministic expected-points engine + zero-hallucination Gemini PWA/Mini App).

Full-Stack Web Developer (Contract) · IVULA Technologies Jan 2024 – Mar 2024 · Remote

- Built mobile-first React/Next.js user interfaces and high-throughput RESTful APIs in Node.js/NestJS across agile cross-functional remote sprints.

IT Systems & Database Associate (NYSC) · Akwanga E-Library Nov 2023 – Oct 2024 · Nasarawa, Nigeria

- Administered institutional databases, LAN infrastructure, and workstation fleets (99%+ uptime) and trained staff on digital systems and cybersecurity.

Junior Full-Stack Developer · TechFusion Africa Apr 2022 – Oct 2022 · Jos, Nigeria

- Developed startup MVPs using **Vue.js, TypeScript, NestJS, and MongoDB**, including **Lickle-Blog** (full-stack CMS) with automated API testing.

HACKATHON WINS & COMPETITIVE ENGINEERING

- 🏆 Official Winner — Web3 Afrika × Bunzz Hackathon (May 2023):** Selected as an official winner for architecting and shipping a modular smart-contract dApp leveraging Bunzz decentralized infrastructure.
- 🥉 3rd Place Winner (2nd Runner-Up) — Avalanche Summer Hackathon (Nov 2022):** Co-led team *Rustydevs* to build **Avax-Lottery dApp**, a provably fair on-chain decentralized lottery protocol on Avalanche C-Chain.
- Global AI & Web3 Hackathon Builder (2023–2026):** Shipped end-to-end systems at **Agents at Work Hackathon** (Sept 2026), **Build with DataHub: The Agent Hackathon** (Sept 2026), **AMD Developer Hackathon** (June 2026), **Hedera Hello Future Apex Hackathon** (Mar 2026), **Request Network Hackathon** (Nov 2024), **Move on Aptos & Code Collision** (2024), **EigenLayer AVS MicroHacks** (May 2024), and **Pi Network Hackathon** (Apr 2023).

EDUCATION

B.Sc. in Computer Science — Bingham University 2019 – 2023
CGPA: 4.18 / 5.00 (Ranked Top 5 in Class) · Second Class Upper Division.
Thesis: Built a *Decentralized Fundraising Platform & Governance DAO*.
Societies: Google Developer Student Clubs (GDSC), University Soccer Team.

CERTIFICATIONS & CREDENTIALS

- Technical Support Fundamentals** — Google & Coursera (Jan 2026)
- Smart Contracts & Blockchain Basics** — SUNY Buffalo / Coursera (Feb 2023)
- Cisco Certified Network Associate (CCNA)** — Verified via Upwork (Jul 2022)
- Cisco IT Essentials** (Mar 2021) & **Web Development** — Coursera (Feb 2023)
